

SUNSET VETS PALLIATIVE AND END OF LIFE CARE

AMBASSADOR PROGRAM

As one of Australia's first mobile palliative pet care services, we're on an important mission. We want to change the way pets are cared for at end-of-life and encourage more families to become empowered to make the best possible health care decisions for their pets.

Join the Sunset Vets Ambassador Program and use your influence to build the pet palliative care movement by spreading awareness and educating people in your circle.

Every little bit counts and it's our hope that we can encourage more families to ask their Veterinarians about palliative care services, leading to better symptom management and pain control for pets in their final days.

OUR VISION

We're passionate about pets. Caring for a pet that is struggling in their old age or terminally ill can be distressing and owners often want to know what more can be done to make their pets comfortable. That's where Sunset Vets come in.

You're probably familiar with the concept of human palliative care, a subspecialty of medicine focused on keeping patients comfortable and out of pain as they approach the end. Well, we do the same, but for animals. We believe that after a lifetime of love and loyalty, pets deserve the most compassionate care possible at the end of life.
